MONEY, STOCKS AND GRAIN

New York Market Easy and Stocks in Demand for Foreign Account,

At Indianapolis Wheat Was Strong, Corn Firm and Oats Easier-Current Prices on Produce and General Merchandise.

MONEY AND STOCKS.

A Reduction in Exchange Rates Creates a

Foreign Demand for Stocks. At New York yesterday money on call was casy at 11 @2 per cent., the last loan being made at 2, closing offered at 2 per cent.

Prime mercantile paper, 34 @54 per cent. Sterling exchange was quiet and easier at \$4.85% for sixty-day bills and \$4.88 for demand.

The total sales of stocks were \$21,853 shares, including the following: Atchison, 24,300; Chicago Gas, 32,500; Delaware, Lackawanna & Western, 25,068; Louisville & Nashville, 7.130; New Jersey Central, 5,400; Northern Pacific preferred, 9,100; New England, 12,157; Reading, 55,100; Richmond & West Point, 4,000; St. Paul, 15,500; St.

Paul & Omaha, 3,800; Union Pacific, 12,855; Western Union, 7,180. The condition of the foreign exchange market and the buying of American stocks for foreign account were the principal factors in the course of prices in the stock market yesterday, and while there was a forenoon of drooping prices with some material losses, the latter portion of the day was not only the recovery of the early declines, but the gain of fractions in addition. London was a liberal buyer of stocks during the whole forenoon, but despite this fact there was considerable realizing in different parts of the list. Chicago Gas was under the hammer continuously and its drop of 24 per cent. had a material influence upon the rest of the list for the time being. The bears believed

that large stop orders had been placed in the stock and went gunning for them with unusual success. The buying for foreign account was of little influence at the time to check the drooping tendency im-parted to the list. Atchison, Burlington, Reading and some others scored losses of 1 per cent., while the entry list lost fractional amounts. The character of the buying. however, attracted attention at this time and the pressure of stocks for sale was reheved while the market from this cause became dull. A reduction in exchange rates gave promise to the prediction of some of the most influential bankers that very little gold would go out. This stimulated new buying, and, to help along the recovery, the coal stocks and Lackawanna in particular were given a sharp upward twist. The inference that the buying was for the following of the new members of the directory stimulated a further demand for the tory stimulated a further demand for the stock. Jersey Central and Delaware & Hudson followed with marked gains on light business, while Reading recovered all of its early decline. The magnitude of the takings for foreign account became apparent and there was a rush to cover the shorts that had been put out earlier in the day, which, with the help of the new buying on account of the improved aspect of the gold movement, soon placed prices on a materially higher level than that of the noon figures. In this later movement Chicago Gas recovered about half of its loss, but the grangers, especially St. Paul and Atchison, were largely traded in at advancing prices. The decline in Chicago Gas had no apparent influence on the industrials, for all, including Sugar and Distillers, were very quiet and firm. and Distillers, were very quiet and firm. The Cordage stocks were specially strong, the preferred rising 21s per cent. The market undoubtedly showed a narrowing tendency, but the late strength displayed was encouraging to buy-ers. The commission-houses, whose

purchases during the forenoon were very limited, became a factor in the late advance. The close was quiet but firm to strong, generally at fractional gains over first prices and at about the highest prices of the day. The final changes were almost all small gains, but while Chicago Gas is down 1% Lackawanna rose 34, Jersey Central 14 and Union Pacific 1 per cent. Railroad bonds were comparatively quiet and remained without special feature of importance throughout the day, prices following closely the stock market. Early losses were offset by later advances. The trading was only \$1,748,000, and only Reading thirds showed any marked activity, furnishing \$124,000 to the grand total. The

final changes were quite irregular.

Government bonds were dull and steady,

Thile State bonds were the same. Closing

For the Live Stock.

Baltimore American. One of the best remedies for bruises or wounds upon cattle or horses is this: First wash the wound out cleanly with castile soap and warm water; then apply burnt clay, mixing it with water until it is of the consistency of thin mortar. Spread it over the wound, covering it completely, then bandage up. It may be kept on for some days before removal. If for any cause the clay must be removed, soak in warm soapsuds, and then gradually remove piece by piece. The advantages of this clay are, first, being exceedingly fine, it knits, when dry, tightly together, excluding the air completely; the wound heals rapidly, and a new skin is soon formed over the wound. Almost any brick-clay will answer. Get it as dry as powder by heating it in the stove. Then put it in a stone mortar and beat it as you would lump answer. mortar and beat it as you would lump sugar, until it is exceedingly fine, then sift it through a hair-cloth sieve. A gallon or so will always be found very useful, especially when many animals are kept. For sore tests, an excellent remedy is to wash with soap and warm water, and apply vasaline cintment, For large cuts and cracks, wash them out thoroughly, and apply with a brush a little shellac varnish. Let this dry. and milk out the teats a few days with a silver tube, which may be had for 50 cents.

A mixed diet of chopped turnips and clover, with only grain sufficient to bal-

ALL KEPT NEAR THE SHORE

Receipts Had Accumulated and Chicago Speculators Did Not Venture.

Those with Long Accounts Got Rid of Their Supply and Shorts Held Back for a Still Further Break on Which to Get Even.

TRADING AT CHICAGO.

Corn Operators Almost Entirely Neglected that Cereal. CHICAGO, Feb. 23.-There was bu little doing here in the speculative markets to-day. The receipts which had accum-

ulated since Saturday showed up big when lumped together. Local bolders dumped any long wheat they held and the prices for May show a loss since Saturday of 14c. Corn was firm, but lifeless; provisions were dull and weak. Wheat started 1900 %o lower, with May at 93c, sellers, followed by an immediate drop to 9234e and shortly after another drop to 924c. The cables were lower, with Liverpool 43d off from yesterday's prices. Paris was rather easier for flour and called wheat was cheaper to sell. There was an increase of 1,056,000 bushels on ocean passage and a decrease of 578,400 bushels in the English visible supply. New York was a liberal seller in this market, and reported foreign houses as also selling freely. Late cables were said to be still weaker than at the opening. Domestic receipts in the Northwest were large-posted at 1,293 cars-and the weather in the wheat belt was favorable. The longs sold out, and the shorts waited for a further break. They were gratified with a further decline toward noon, to 924c. Parcridge sold some during the decline, but turned buyer around 0240, and took in perhaps 500,000 bushels more than he had previously disposed of. There was a slight reaction at 9240 near the close, the last figure being 934c.

almost to a stand-still after the first twenty minutes of the session, and the prices scarcely moved from 41% c for May. Afterward it got as high as 41% c and as low as 41 % @41% c. closing at 41% c. Some shorts, among them Pardridge, Sibley and Cudaby, bought considerable. Armour and Harvey were moderate sellers early, presumably against their elevator receipts. Liverpool was quoted firm.

Oats were quiet and weak, in sympathy with the easy feeling in wheat and corn. May sold early at 81 4 @314c, fell to 31c, and later reacted and closed at 31%c. Hog products were quiet and decidedly lower; the receipts of hogs were in excess of the estimates, and prices at the yards were 5@10c lower. This etarted a good deal of speculative selling, and as there was little demand, lower prices resulted. May pork sold early at \$11,724, broke gradually to \$11.52, reacted to \$11.60, and again sold off to \$11.55. May lard sold from 6.60c to 6.65c, and closed at 6.55c. May ribs fell from 5.971c to 5.871c, and closed at 5.90c. The leading futures ranged as fol-

The market was about 5c lower all round. Extreme range of prices, \$4@4.60; bulk, Sheep-Receipts, 1,000; shipments, 400. The market was strong.

Bedroom Curtains, New York Tribune.

There are a great many things which will make pretty bedroom curtains. As a rule such curtains should be of a sheer, light material which may be easily laundried. Swiss muslin, either embroidered or in tamboured figures, has for years been a favorite choice for bed-room draperies. A curtain of Swiss muslin should be finished with a ruffle of lace or a plain ruffle of the muslin, which may be crimped or fluted, though very little fluting is used to-day. One of the pretty materials now in use for simple curtains is the Anatolia muslin, a pretty, crinkled, seersucker ma-terial, which comes in plain ecru and in ecru striped with color, either red, yellow or blue, and is finished with a knotted fringe. A simple sash curtain, which covers the casing merely, or a long curtain which barely clears the floor may be used in a bedroom In case the sash curtain is put on, it should be placed next the window ontside the window shade. Where a room is gloomy a curtain with some color in it like the

Madras muslins will often give a cheerful

appearance. A yellow and white Madras

curtain or a sheer curtain figured with terra cotta will give a brighter appearance

than a cold white curtain. The best way to hang all sheer curtains is to lay them in little box-plaits about an inch wide, separated by spaces of about two or three inches according to the full-ness of the curtain. Attach a ring of wood or metal about an inch and a quarter in diameter to each plait. These rings should then be rup on an inch pole on which they will easily move. The use of a certain warm shade of yellow in the upholstery and hangings in a north room is often very effective, scintillating, as it does, the warmth and glow of sunshine where there is no

-THE-

DAILY, SUNDAY AND WEEKLY.

The Journal is first of all a newspaper.

Its primary object is to publish the news, and to secure this it spares no pains or expense. Besides the service of two great news agencies, which cover foreign countries as well as the entire United States, it has a corps of Special Correspondents, who give attention to those events and occurrences that are likely to be of particular interest to the Indiana public. Its Washington bureau was established for the purpose of looking after matters in which the State and its people are concerned, and is under the management of an Indiana man well acquainted with the local business and political issues. It has a correspondent in every town of importance in the State, and is constantly increasing its facilities for obtaining information from every quarter. Its staff of city reporters is large, and its local departments are unexcelled. As a newspaper it is far better equipped than any other in the State, and welcomes comparison with its contemporaries in any and all of its departments. With all it endeavors to be accurate and trustworthy, printing the news, whatever it may be, without personal or partisan

But while the Journal is non-partisan as to news, it is a Republican paper, and sets forth Republican principles. It is important that the people shall read the truth about these principles, and it was with the object of putting everybody in the way of doing so that the price of the

- Was reduced to -

No other method of securing a Repubthe circulation of Republican papers among voters. Since the reduction in the price thousands of subscriptions have poured in from all parts of the State, showing that a need was supplied. In order to have the proper influence and effect upon voters seeking for trustworthy information the Journal should go into their bands at once, and not next spring or summer. Clubs are being formed and agencies established wherever daily mails reach, and as rapidly as traveling agents can visit the places, but Republicans in each and every locality cannot do their party greater service than to interest themselves in circulating the Journal.

The Sunday Journal

Is a paper that gives more attention to miscellaneous literature than the other editions, and contains in its sixteen, and often twenty, pages a variety of
